

## IDX Declaration of Transportation

1st January 2008

The following is an IDX declaration regarding the transportation of IDX Lithium Ion batteries under the 49<sup>th</sup> Edition of the IATA Dangerous Goods Regulations (2008) and the US Department of Transportation PHMSA Hazardous Materials; Transportation of Lithium Batteries; Final Rule (effective Jan 1<sup>st</sup> 2008).

Effective Jan 1<sup>st</sup> 2008 the following rules apply to travelling with Lithium Ion batteries as spare batteries on passenger aircraft:

- Spare batteries are the batteries you carry separately from the devices they power. When batteries are installed in a device, they are not considered spare batteries.
- You may not pack a spare Lithium Ion battery in your checked baggage.
- You may carry-on spare Lithium Ion batteries with you in carry-on baggage.

The following quantity limits apply to both your spare and installed batteries. The limits are expressed in grams of "equivalent lithium content". 8 grams of equivalent lithium content is approximately 100 watt hours. 25 grams is approximately 300 watt-hours:

- Under the final rules, you can carry-on batteries with up to 8-gram equivalent lithium content. (All Lithium Ion batteries in cell phones are below 8 gram equivalent lithium content. Nearly all laptop computers also are below this quantity threshold.)
- You can also carry-on up to two spare batteries with an aggregate equivalent lithium content of up to 25 grams, in addition to any batteries that fall below the 8-gram threshold.

Product Name	Description	Lithium Content
ELITE	Lithium Ion Battery Pack	5.76g (PC-14 Cartridge) x 2
E-10	Lithium Ion Battery Pack	7.92g
E-10S	Lithium Ion Battery Pack	7.92g
E-10S HD	Lithium Ion Battery Pack	7.38g
PowerCube	Lithium Ion Battery Pack	7.20g
E-80	Lithium Ion Battery Pack	6.84g
E-80S	Lithium Ion Battery Pack	6.84g
E-7	Lithium Ion Battery Pack	5.76g
E-7S	Lithium Ion Battery Pack	5.76g
E-50	Lithium Ion Battery Pack	4.56g
E-50S	Lithium Ion Battery Pack	4.56g
NP-L7	Lithium Ion Battery Pack	5.76g
NP-L7S	Lithium Ion Battery Pack	5.76g
NP-L50	Lithium Ion Battery Pack	4.56g
NP-L50S	Lithium Ion Battery Pack	4.56g

IDX hereby declares that the battery pack models listed above have aggregate equivalent lithium content below the 8g requirement.

## IDX Declaration of Transportation

1st January 2008

The aggregate equivalent lithium content in the IDX battery packs stipulated above is not more than 8g. Therefore the ELITE (PC-14 cartridge), E-10, E-10S, E-10S HD, PowerCube, E-80, E-80S, E-7, E-7S, E-50, E-50S, NP-L7, NP-L7S, NP-L50, NP-L50S, when packed so as to prevent short circuit, can be transported as defined by IATA, Department of Transportation regulations.

For more information regarding Travelling Safety with Batteries and Battery-Powered Devices, please see the website below:

[http://safetravel.dot.gov/whats\\_new\\_batteries.html](http://safetravel.dot.gov/whats_new_batteries.html)

**IDX products can be transported IAW the above regulations, but IDX recommends that customers confirm with their carrier of choice to determine any local rules and policies before travelling.**
